Summary
Final-year BCA student with hands-on experience in Flutter mobile app development and full-stack projects using Firebase. Skilled at building functional apps, solving problems efficiently, and learning new tech quickly. Completed a college summer internship and multiple project-based full-stack apps.

Skills

- **Programming & Tools:** Dart, Flutter, Node.js, Express.js, MongoDB, Firebase, JWT, HTML5, CSS3, JavaScript (ES6+), JSON, React.js, Tailwind CSS
- **Web & App Development:** Frontend design, UI/UX, REST APIs, responsive layouts
- **Project Management:** Git, testing, debugging, in-memory data handling
- **Soft Skills:** Quick learner, problem-solving, independent & team work

---

Summer Internship
Trinite Digital – Flutter Mobile App Development

- College-assigned internship project on **ComicVerse**, a Flutter-based e-commerce simulation app for Manga, Novel, and Webtoon.
- Worked on Flutter UI, app logic, and basic state management.

College Project (Full-Stack)

- **College Attendance Management System (BLUEMARK)** – Real-time attendance tracking using Firebase; role-based access for Principal, HOD, Staff, and Students.

Personal Projects

- **TUNO (Flutter + Firebase)** – WhatsApp-like chat app with real-time messaging, Google authentication, and profile & bio sync.
- **Food Delivery Backend (Node.js + Express + MongoDB)** – Role-based backend (Vendor, Driver, User), JWT authentication, scalable for frontend integration.
