## SUMMARY

BCA graduate (2026) with hands-on experience building and shipping software across mobile, full-stack web, and machine learning. Delivered a Flutter e-commerce app during a college internship, built role-based full-stack platforms on Node.js, Express, MongoDB, and Firebase, and deployed AI-powered tools to Vercel and Render with CI/CD pipelines. Consistently takes projects from idea to tested, working product — from an explainable-AI health predictor to a zero-dependency remote-desktop app. Open to opportunities in any line of software — mobile, web, backend, ML/AI, games, or tools.

## SKILLS

**Languages:** Dart · Python · JavaScript · TypeScript
**Mobile & Frontend:** Flutter · React.js · HTML5 · CSS3 · Tailwind CSS
**Backend & APIs:** Node.js · Express.js · REST APIs · JWT Authentication
**Databases:** MongoDB · MySQL · SQLite · Firebase (Auth · Firestore · Realtime DB)
**ML / AI:** scikit-learn · XGBoost · pandas · NumPy · Streamlit · SHAP · LIME
**DevOps & Tools:** Git · GitHub Actions (CI/CD) · Vercel · Render · Linux · VS Code
**Practices:** Testing & debugging · PWA & service workers · E2E encryption (AES-256-GCM)

## EXPERIENCE

**Trinite Digital — Flutter Mobile App Development Intern** *Summer 2025*

- Built ComicVerse, a Flutter e-commerce simulation app for browsing and buying manga, novels, and webtoons
- Worked on the Flutter UI, app logic, and state management — authentication, search, category browsing, and cart

## PROJECTS

### Foodverse — Full-Stack Food Delivery Platform

*Node.js · Express · MongoDB · React · JWT*

- Role-based platform for Customers, Vendors, and Delivery Partners with JWT authentication and protected routes
- Complete order lifecycle (Placed › Preparing › Ready › Delivered) plus a vendor dashboard for restaurant and menu management
- Layered backend architecture (Repository › Service › Controller) designed to scale to new clients

### diabetes-xai — Explainable AI for Early Diabetes Prediction

*Python · scikit-learn · XGBoost · SHAP · LIME · Streamlit*

- Reproduces the Sisodia & Sisodia (ICCCIDS 2018) baselines on the PIMA Indians dataset and improves on them with Random Forest / XGBoost, imputation, scaling, and tuning (10-fold cross-validation)
- Streamlit web app that explains every prediction with SHAP and LIME and generates doctor-friendly PDF-style reports
- Forked on GitHub; ships with a reproducible training pipeline, saved models, and a QA test suite

### Chat Boy AI (Ai-bot) — Secret End-to-End-Encrypted Chat

*JavaScript · Node.js · WebCrypto · Render · ntfy push notifications*

- A decoy AI chatbot that unlocks into a real end-to-end-encrypted chat: AES-256-GCM with PBKDF2 key derivation (210k rounds); the server stores ciphertext only
- Deployed on Render with self-healing push subscriptions, session-code verification, and auto-lock; hardened over 55 commits

### NEET-AI — AI Tutor Study App

*HTML · JavaScript · OpenRouter API · Vercel · GitHub Actions*

- Single-file AI study tutor for NEET-UG, deployed live on Vercel with a service worker for offline install
- CI/CD pipeline injects the API key at deploy time via GitHub secrets (never committed); 382 automated checks passing

### Pocket Desktop — Control Your Linux PC from Your Phone

*JavaScript · Linux · X11 · zero dependencies*

- Remote desktop over local Wi-Fi: pointer and keyboard control, scroll/zoom, screenshots, clipboard sync, and lock/suspend — no cloud service, no account
- v1.3.1 released October 2026 with a portable setup script supporting apt, dnf, pacman, and zypper

### Vault-for-me (RepoVault) — Encrypted GitHub-Backed File Vault

*JavaScript · WebCrypto · PWA · MIT License*

- AES-256-GCM encrypted file storage using a private GitHub repository as its backend; installable PWA with offline shell and screen lock
- 106 tests across 8 suites with zero dependencies; includes storage-reclaim tooling (history folding, ZIP export, delete & rebuild)

### TUNO — Real-Time Chat Application

*Flutter · Firebase*

- WhatsApp-style messaging app with real-time synchronization, Google authentication, and profile & bio management
- Live chat updates without refresh, backed by a scalable Firebase backend

### ComicVerse — Flutter E-Commerce App (Internship Project)

*Flutter · Firebase*

- Storefront for manga, novels, and webtoons with category-based navigation and search
- Cart system with state management and session-persistent login — built during the Trinite Digital internship (see Experience)

### BLUEMARK — Attendance Management System (College Project)

*Dart · Firebase*

- Real-time attendance tracking with hierarchical role-based access for Principal, HOD, Staff, and Students
- Centralized Firebase database, secure login with session control, and dynamic student record management

### Crop Yield Prediction — ML Desktop Application

*Python · scikit-learn · pandas · tkinter*

- Random Forest regression model predicting crop yield from soil and environmental factors, with a preprocessing pipeline and joblib model persistence
- Cross-platform desktop GUI (tkinter) for real-time predictions on Linux and Windows

## ADDITIONAL PROJECTS

**Pixel Dodge (simple2dgame)** — 2D arcade survival game with coin collection and leaderboard (TypeScript) · **Chess-knight · bingo-game · OXO_GAME** — browser games (TypeScript) · **Delivery-Backend** — standalone role-based food-delivery REST API — Vendor, Driver, User with JWT (Node.js · Express · MongoDB) · **billingsystem** — billing/invoicing application (Python) · **aniflx** — anime-related tooling (Python) · **NRJ-EARTHMOVERS** — small-business website (HTML · CSS · JavaScript) · **tools** — assorted utility scripts · **PLAYSTORE** — storefront-style web page (HTML) · **Flutter-ios-build** — iOS build setup for Flutter apps (Dart) · **Reverse-engineering-data-s** — data-structures practice project (Dart) · **portfolioo** — personal portfolio site v2 (TypeScript) · **cid0980.github.io** — live GitHub Pages site · **VirtualGamePad-PC** — fork of an open-source virtual gamepad server (C++)

## EDUCATION

**BCA — Christ Arts and Science College, Moolaklom, Puducherry** — Graduated 2026 · CGPA: 7.40

**Higher Secondary (12th) — TT Narasimhan Swami Dayananda Higher Secondary School** — Score: 60%
